Skills

Web development

Frontend, Backend & DataBases

HTML, JavaScript, CSS, Java, REST, SQL

CI/CD

Automated Testing and Deployment

Workflows, Testing

Version Control

Git, Github

Containerization

Docker

Cloud

Deployment to AWS

AWS

Languages

Dutch

Native Speaker

English

Fluent

Student software developer specializing in web development and working in the cloud.
Currently in my final year of college

Education

Hogeschool Utrecht **September 2022 - July 2026**

Utrecht Bachelor ICT

Experience

Sue | Cloud Native Solutions **Feb 2025 - Jul 2025**

Intern Geldermalsen

https://sue.nl/

During my internship at Sue, I researched how LLMs could be used to automatically monitor and analyze cloud infrastructure. I also dove into the workings of the Model Context Protocol, and its appliances for realizing LLM driven AI agents that can automatically manage cloud infrastructure.

Projects

SQLQuerryAssist **Sep 2024 - Jan 2025**

The goal of the SQLQueryAssist was to let users query their databases using natural language. It utilized a LLM to analyze the users database, so that it could convert data requests into SQL queries, which were then executed, and the result used to have the LLM answer the users request in a conversational manner.

Certifications

AWS Certified Developer **March 28, 2025**

Amazon Web Services Training and Certification
